

Over 1.6 million Australians are affected by Acquired Brain Injury.

Over 1 in 12 Australians suffer the affects of an Acquired Brain Injury (ABI). This 'silent epidemic' is growing as are the needs of those living with an ABI. Likewise SYNAPSE is striving to grow to meet their needs by providing information and assistance where possible.

Over the page you will find a range of resources that we make available to our members and supporters. Whilst we do not charge for these resources, we do rely upon financial support through memberships and donations to maintain our services and resources. Your membership or donation would be greatly appreciated and go a long way in reconnecting the lives of those with an ABI. You will find that our web site has a wealth of information about ABI and behaviours that challenge our understanding. And of course you can speed up your membership or resource order by doing it online. Once again thank you for your support.
